Moleskine Versus Ecosystem

Elaine Olaes de Guzman

Similarities:

Hardcover or Soft cover

Built-in bookmark

Stretchy thing, so you don't have to worry about it opening to an embarrassing entry if it happens to fall out of your bag.

Built-in pocket!

Differences:

Ecosystem HAS PERFORATED EDGES while Moleskine doesn't

You can custom order Ecosystem journals (But you have to order a minimum of 50) while you have many different choices for Moleskine

Moleskine comes in mostly black and red while Ecosystem comes in 6 different colors.

Each Ecosystem has their own personal code, so you can register it.

Ecosystem is made out of 100% post-consumer waste

Yay for saving the Earth (:
