TOOLS FOR GREEN LIVING

Resources for Eco-Awareness and Action

THOUGHT KEEPERS

Sometimes you want to use an actual pen and paper to jot down notes and brilliant thoughts, but without being accused a paper waster. **Ecosystem** is a new set of planners and journals (\$9.95-\$19.50) made in the U.S. with 100% post-consumer recycled paper sold exclusively at Barnes & Noble. Buyers can find out where their book was made, how many people assisted in its production and the environmental benefits of their particular book by visiting a designated website. And each Ecosystem planner and journal comes with recycling instructions.
